- 24/7 access to
- 24 hours of online professional development

To register or for more information:

1. Go to www.ccsprojects.com/az
2. Click on "Training"
3. Click "CCS Anytime"

Tools for Learning Spotlight...

Rear Projection SMART Board™

The all-in-one system for enhanced classroom outcomes

©SMART Technologies-2008

The *Rear Projection* SMART Board™ interactive whiteboard turns your classroom into an interactive learning center that engages students and improves learning. The board's bright, touch-sensitive display invites your students to "see and do"; a proven approach that makes understanding material and retaining information easier.

A **cost-effective** alternative to systems that require a separate projector, media cart, audio system, floor stand, interactive whiteboard and cabling, it combines all of these elements in one easy-to-use, mobile package. A unique height-adjustment feature makes the board accessible to all users, including those with special needs. The durable screen provides a large workspace, and the integrated rear-projection system means you can work without casting a shadow on the screen.

For more information see the flyer on page 4 or contact CCS.
