#### CCS in the Spotlight!

**98,000 lbs!**

The latest publication to take an interest in our plane pull is Business New Hampshire Magazine in their Number Crunch section of their November issue. CCS New England pulled 98,000 lbs 20 feet in 10/34 seconds!

For more information on the Wounded Warriors Project, please visit their website: [Wounded Warriors Project](#)

#### Greetings!

CCS Presentation Systems is one of the leading providers of sales, design, integration, installation, maintenance and training of audio visual equipment including: projectors, plasma & LCD displays, SMART Board interactive whiteboards, classroom response systems, digital signage, control systems, projection screens, audio systems and video conferencing to education, corporate and government clients across New England for over 13 years.

In CCS Nationwide news, we are proud to celebrate 20 years of quality service to the Audio Visual community. Here's hoping to 20 plus more years to come!

#### CCS NEW ENGLAND GOES GREEN!

The key to energy management is tracking—tracking equipment usage, lighting maintenance and room usage. This is what AMX's RMS 3.3 will do for classrooms, corporate meeting rooms, colleges and more. The RMS Enterprise systems simplifies operation, support and security for up to 1,000 rooms and up to 10,000 assets either in a centralized location or remotely. Reports can be generated to show which assets and rooms are running when they are not being used or occupied therefore wasting energy and money. A company can extend the life of assets that can be turned off when they are not in use. For a big high rise, that can add up over the course of a year. Below are even

**CCS Awards and  
Certifications:**

**WE WON!**

CCS New England is proud to announce on October 27th Cheryl Gamst won the New Hampshire Business Review's Business Excellence Award in Technology.

Congratulations to Cheryl on a well deserved win!

more benefits for your school or business:

**Increases Efficient:**

- Scheduling allows more efficient use of room.
- Scheduling maintenance means it isn't done on an emergency basis.
- Proactive maintenance increases uptime and ensures rooms are effectively used.

**Decreases Room Downtime:**

- Because of system warnings if there is a problem.
- Because equipment can be remotely managed.

**Reduces Cost:**

- Energy Management—lights & equipment are automatically turned off.
- Head count can be redeployed because of increased efficiency.
- ROI—There is a strong ROI story that shows how the investment in RMS is quickly re-captured—in as little as a year.

**Other**

- Future savings—usage and utilization on reports help determine what equipment is used, what can be redeployed, and where technology updates are most urgently required.

With more high-tech devices being brought into classrooms and boardrooms, managing all of them at the same time becomes challenging. With systems like the RMS Enterprise, that challenge can be faced head on and progress can be made to make things last longer and costs of running all of the equipment can go down over time.

CCS New England's training room now includes AMX gear including their energy efficient touch panels and control systems.

To see how CCS Presentation Systems can help your classroom or business become greener and more energy efficient, contact one of our account managers at (978) 256-2001.

## CRESTRON AMP-SERIES AMPLIFIERS!

Energy efficient products are popping up everywhere to help all businesses cut costs and control multiple items all at once. Crestron, with its all new AMP-Series Commercial Amplifiers, is helping businesses control multiple rooms from one system.

These Energy Star amplifiers will enable organizations to fulfill their green initiatives without compromising and audio performance. With 5 different models to choose from, the AMP-series is versatile enough to work in large convention centers and arena concourses as well as small corporate board rooms and university lecture halls. They are also versatile enough to handle virtually any commercial audio need with common uses being for background music, AV presentation, paging public address and other similar uses.

Companies won't have to go out and purchase a specific amp for every type of room they have—the AMP-series brings enough power and high quality audio to hand multiple rooms at the same time. The “power-down” mode helps to make that possible because after 30 minutes of non-activity, the AMP will shut down for that room/output automatically and it will not be turned on again until a signal is detected for that specific room/output.

For more information about Crestron AMP-series Energy Star Amplifiers, contact a CCS Sales Representative today at (978) 256-2001,

## SMART BOARDS AT CCS NEW ENGLAND!

CCS New England now has several SMART Boards at our Nashua, NH demo room including the SMART Board 885ix Dual Touch and the SMART Board 8070i.

The 885ix Dual Touch offers students an extraordinary natural learning experience that makes it easy to interact with lesson content. It enables 2 students to instantly start working on lesson activities at the same time, allowing each student to work in a way that is intuitive to them.

The 70" LCD Interactive Display can help corporations and business of all sizes thrive in collaboration and teamwork. This allows more options for generating ideas and capturing feedback and ensuring all members of the team are working towards the same goal.

Call your sales representative right away to come in and take a look at these boards for yourself.

To learn more about the SMART Board 800 Series and the SMART Display 8070i call a CCS Sales Representative today at (978) 256-2001.
