Tools for Learning Spotlight

SMART Response VE

If you have a SMART Response set, did you know that you can now deploy your assessments over the Internet? Cell phones and other mobile devices are becoming fixtures in the lives of today's students. And many schools are embracing that technology, turning it into part of the learning process. With the SMART Response VE interactive response system, students can participate in classroom assessments using their own Internet-enabled devices. To try out the beta for SMART Response VE, do this:

- Update your SMART Response software to the most recent version.
- For Windows, click on Start, then Programs, then SMART Technologies, then SMART Response, then Setup Tool and select Response VE. For MAC, go into your Applications folder, then SMART Technologies, then SMART Response, then Setup Tool and select Response VE.
- In Notebook, select the Response tab and then start an assessment. A window will pop up that will give you the address where your students will go and also the ID for them to log into your assessment.

Ask your sales consultant for more information on pricing and availability!

SMARTBoard Curriculum Integration -- October 12: 9 a.m. - 12 p.m.
SMART Response Basics -- October 11: 10 am. - 12 p.m.

Tips and Tricks

Using Your Document Camera with Notebook Software

Notebook software is designed to flawlessly integrate the SMART brand Document Camera into Notebook. When a SMART Document Camera is connected to your computer, the Document Camera icon will launch a viewer, which allows you to see what's under it. You can use this feature to take a picture of the image and integrate it into your Notebook file.

But did you know that you can still integrate your Document Camera into Notebook software, even if it is a different brand than SMART?

Follow the steps below to find out how, or view the video by going to www.smarterclassrooms.com and logging in.

Step One: Install the driver for your Document Camera onto your computer. The driver usually comes on CD with your Doc Cam. You might also be able to download it from the brand website (ie. EPSON or Samsung).

Step Two: Plug your Document Camera into your computer through its USB port, and turn the Doc Cam on.

Step Three: Open Notebook software.

Step Four: On the Notebook file menu, go to Insert> Picture from Scanner

Step Five: Select "TWAIN" and find your Document Camera. Press "Scan".

Step Six: Your image should be visible within Notebook software!

To see a video demonstration, go to www.smarterclassrooms.com and log in.
