Power-Up Your System with Cool Accessories!

Optimize your SMART system by adding in one or all of the snazzy following accessories:

Wireless Bluetooth Connection

Did you ever want to use your SMART Board and not have to connect a USB cable between your computer and board? Using the SMART Wireless Bluetooth connection you can eliminate the need for that cable.

GoWire SMART Notebook Software Auto-Launch Cable

Do you have a SMART Board that frequently has visitors wishing they can hook up to it but they do not have the Notebook software installed on their laptop? Get your presentations started in seconds with the GoWire SMART Notebook collaborative learning software auto-launch cable. The GoWire cable uses a USB connection to automatically launch SMART Notebook collaborative learning software and provide full access to the software and its tools. There is no need to install the software on a computer.

SMART Pointers

Become a Member of our Online Community

Find and share California-specific lesson plans, learn about grants and other funding sources, watch training videos, hear about the latest promotional offers, and stay up to date with ALL the latest educational technology by joining our online community, **SMARTERClassrooms**. Sign up today and continue your training today - and every day of the month. And if you don't already receive this newsletter directly, please:

Every inch of your lesson is within reach when students use SMART Pointers. These colorful and engaging pointing tools enable students to reach the entire surface of a SMART Board interactive whiteboard or interactive display.

SMART Pointers are available in bundles of four. Practical and easy to hold, they ensure that students of all ages and abilities can participate in a lesson. Each shatter-resistant, durable plastic pointer is 15 1/2" (39.3 cm) long, with a smooth, finger-shaped tip.

Height-Adjustable Wall Mount

Do you have shorter students and would you like to raise and lower the board at will? Move the SMARTBoard interactive whiteboard system up or down by 20" (51 cm) with the powered SMART Height-Adjustable Wall Mount. The interactive whiteboard can be lowered to enable young students to reach it easily, and raised for teachers and taller students. The wall mount is simple to install, and with the push of a button you can easily adjust the height and lock it at its highest point so students at the back of the class can see.

Ask your sales consultant for more information on pricing and availability!

Tips and Tricks

Create a Standards-Based Crossword Puzzle

SMART Notebook Express

SMART has recently launched a web-based version of SMART Notebook software that allows you to open Notebook files over your internet browser. This is excellent for sharing Notebook files with people who don't have Notebook software, and it's free of charge! Encourage parent involvement by sharing your Notebook lessons with them. Have students follow along and interact with your lessons while in the computer lab. Interactive components such as Flash activities, animation, infinite cloner, and object movement are fully functional in Notebook Express. So are pens, erasers, screen shades, audio and video. Notebook Express makes it easy for your lessons to come to life over the internet!

To access SMART Notebook Express, go to <http://express.smarttech.com>.

To see a video demonstration, go to www.smarterclassrooms.com and log in.
