SMART Board 885ixe Interactive Whiteboard for Administrators

Discover new ways to drive productivity

Collaboration sessions can begin immediately on the 885ixe system. Team members can hold interactive brainstorming sessions using the whiteboarding function, browse the Web and view PDFs. All meeting notes and annotations can be saved to a pre-configured network drive, a USB flash drive or a connected laptop, and they can also be distributed via e-mail. And it's easy for remote participants to join in on these sessions in an interactive way. These benefits, combined with its ease-of-use, help to facilitate your teams' rapid adoption of the 885ixe system and increase their productivity.

We've Moved and EXPANDED our L.A. and O.C. Offices!

In August, we moved our L.A. and O.C. offices to a new HQ location in the City of Hawthorne. Among other features, this office includes a new state-of-the-art training center to support our customers' growing demand for professional development.

It also houses our corporate HQ, so it will also be our new remit-to address. The new address and phone numbers are:

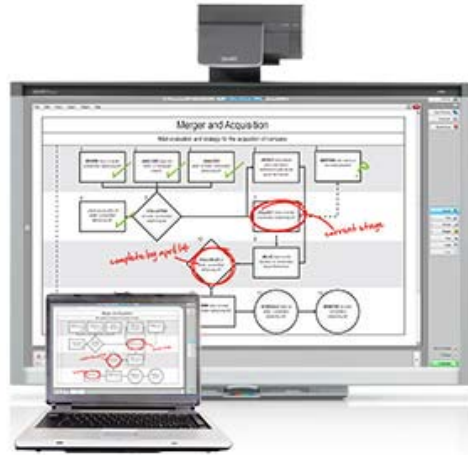

3331 Jack Northrop Avenue
Hawthorne, CA 90250

(424) 675-2600 Phone
(424) 456-3844 Fax
(888) 454-4489 Toll Free

New Hawthorne Location

As always, you can also visit and join our online community, at [SMARTERClassrooms](#). Sign up to continue your training

today - and every day of the month. And if you don't already receive this newsletter directly, please:

Enhanced security, reduced system maintenance

The 885ixe is a fully integrated, appliance-based system designed for environments with no requirement for an in-room computer and where less reliance on IT support is needed. Only an administrator can configure and change the system's settings. Its simplified, on-demand functions, quick and easy laptop connection and locked-down system design minimize IT support requirements and increase reliability, enabling IT personnel to focus more on mission-critical business systems.

While meeting notes can be saved anytime to a network location or a USB flash drive, or distributed via e-mail, the system does not keep any residual data, thus preventing anyone from accessing confidential information from previous meetings. Additionally, meeting participants are not required to log on to the system under personal credentials, and the system is immune to spyware and malware.

You can be confident that the 885ixe meets your IT standards and achieves a balance between network security, user access and guest.

It's all about collaboration

Intuitive and easy-to-use, the 885ixe system facilitates an interactive collaboration experience that can be rapidly adopted by your team. This rapid adoption helps facilitate increased understanding, faster and more informed decision making and energized participation with co-workers, whether they are in the same room or joining from remote locations.

Turn ideas into action

To help ensure your words rise above the ambient noise of your classroom without causing vocal strain, SMART Audio is equipped with a wireless infrared microphone, four wall- or ceiling-mounted speakers, a room module that combines an amplifier and infrared sensor, and a control unit that provides a USB connection to the computer.

Integrate with existing systems

The 885ixe system gives you exciting ways to interact with digital content. You can write with a pen or your finger and erase with your fist. And because it supports touch gestures, you can zoom, rotate, pan, flick and toss objects. Two people can write, erase and manipulate objects simultaneously - SMART's patented DVIT (Digital Vision Touch) technology automatically recognizes what each user is doing and enables the interactive whiteboard to respond accordingly.

Ask your local sales rep for more information about the SMART Board 885ixe.

Tips and Tricks: How to do an Advanced Calibration on your 800 Series SMART Board

Does your 800 series board's calibration continually drift? If so, you might have to do a hardware calibration of your board!

1. Connect your computer to the SMART Board with the USB connector. Click on the SMART Board icon on the Windows Notification Area (bottom right hand corner of the screen) for Windows or CTRL+click on the icon on the Dock for MAC.

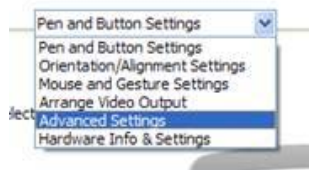

2. Select Control Panel

3. Select SMART Hardware Settings

4. In the drop down menu, select Advanced Settings

5. Click Calibrate.

6. Follow the directions on the screen.

To see a video demonstration of Tips and Tricks, go to www.smarterclassrooms.com and log in.
