Tools for Learning Spotlight

SMART Response XE

Students in secondary education have more sophisticated needs than their younger counterparts and that means you need to provide more sophisticated assessments. The new SMART Response™ XE interactive response system enables you to deliver a wide variety of questions, and the alphanumeric remotes (or clickers) allow for advanced responses - perfect for math and science.

Coming soon

SMART Response XE features full QWERTY keyboard remotes (or clickers), a receiver and powerful assessment software that allows you to easily deliver assessments and evaluate results. Enhancements to Teacher Tools allow you to import questions, export results, and access and organize data from 1 location.

SMART Response XE is coming out in summer 2010. Contact your CCS sales rep for pricing and availability.

SMARTBoard Curriculum Integration -- June 8: 2 p.m. - 5 p.m.
SMART Response Basics -- June 7: 2 p.m. - 4 p.m.

Tips and Tricks

Changing Background Transparency on an Image

Have you ever taken an image from the internet or clipart and wanted the white background behind it to disappear? Well, SMART Notebook software has a feature that does just that...allowing you to use a colored background on your Notebook pages and still integrate these images or clip art. The steps below show you how to turn the background on an image transparent.

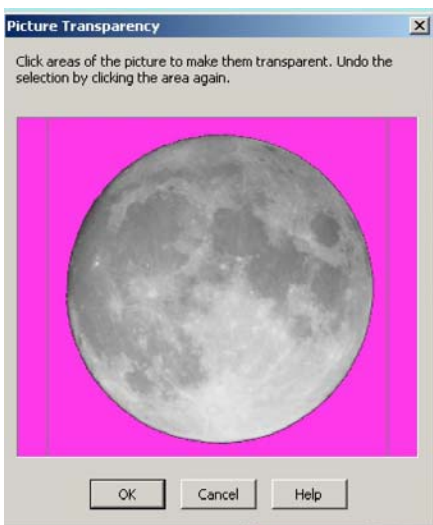

Step 1: Find the image you want and put it on your Notebook page. This can be done by Copy/Paste or by using your Screen Capture Toolbar. You can even bring one out from the Gallery.

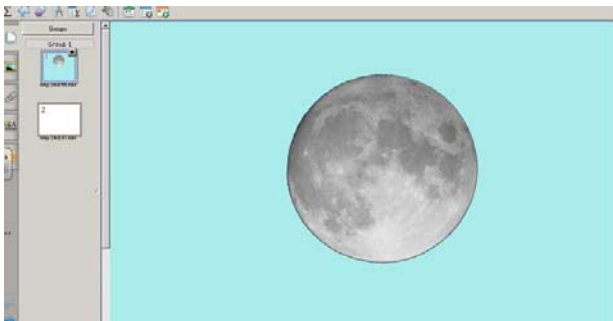

Step 2: Click on the Drop-Down Menu in the upper right corner of the object, and select Set Picture Transparency.

Step 3: Using the eyedropper tool in the Picture Transparency window, click the areas of the picture to make them transparent. Then, select OK.

You now have the same image on your Notebook page, but it blends seamlessly with the background color of your choice!
