## **CCS CELEBRATES THE BIG 2-0**

CCS, the largest audio and visual integrator in the Southwest, celebrated its 20th anniversary with a national sales summit at Talking Stick Resort last month, bringing together its customers and partners from 13 states. The Airpark-based company showcased its A/V technology in the resort's award-winning CCS-designed Professional Poker Room, which is the technological centerpiece of the 240,000-square-foot casino gaming area.

In addition to its 20-year milestone, CCS celebrated multiple successes for its work and industry impact in 2011. CCS won a coveted 2011 ProAV Spotlight Award in the Casino A/V Project Category for its work on Talking Stick Resort. CCS was also recognized this year by *Inc.* magazine for the third consecutive year as a top growth company by making the *Inc.* 5000 list.

CCS continues to make its mark among Arizona K-12 educators for its annual Classroom Solutionz grant opportunity that helps teachers win a technology-infused classroom and equipment training worth thousands of dollars. In 2011, CCS will award grants to multiple teachers for the first time as it expands the program.
