**CCS Presentation Systems Awarded Scottsdale Unified School District**  
Enhanced classroom technology project set for 2009-10 school year

**SCOTTSDALE, Ariz. – (October 13, 2009)** – CCS Presentation Systems, the largest integrator of audio and visual equipment in the Southwest, today announced a new project with the Scottsdale Unified School District (SUSD). CCS will design and install new state-of-the-art presentation technology in 1,000 classrooms throughout the school district over the next school year.

The SUSD Governing Board approved CCS' recommendation for the purchase of new classroom technology equipment including: new ceiling mounted projectors, document cameras, wireless sound systems, interactive whiteboards and other collaborative learning tools.

"With this district-wide installation, CCS will be providing Scottsdale educators and students with a cutting edge learning environment," said John Godbout, founder and CEO of CCS Presentation Systems.

Although CCS currently works with school districts throughout Maricopa County, this will mark the first time CCS has performed a district-wide installation with the SUSD.

CCS is an innovator in audio and visual training among educators and corporate professionals. CCS trains more than 3,000 educators each year through its centers in Scottsdale and Tucson and through its Mobile Training Center, which debuted in March 2007. The Mobile Training Center includes a 12-seat computer lab featuring both Windows and Mac platforms and provides access to the latest audio and visual equipment for training corporate and educational clients. CCS instructors teach administration and faculty members to use interactive whiteboards, projectors, document cameras, digital and video cameras, audience response systems and more.

**About CCS Presentation Systems, Inc.**

Since 1991, Scottsdale, Ariz.-based CCS Presentation Systems has served customers in the corporate, government and educational sectors. CCS provides full-service integration, installation and maintenance of audio and video equipment, including interactive whiteboards, projectors, LCD & plasma displays, audio systems, document cameras and more. The company has expanded from a two-person operation to one of the largest A/V integrators in the U.S., with more than 300 employees, sales offices in 27 locations and annual sales in excess of \$150 million.
