**CCS Presentation Systems Ranked
Among America's Fastest Growing Private Companies by *Inc.*
Magazine for the Second Consecutive Year**

SCOTTSDALE, Ariz. – (August 20, 2009) – CCS Presentation Systems, the largest integrator of audio and visual equipment in the Southwest, today announced its recognition by *Inc.* Magazine as a top growth company for 2009. CCS was ranked in the publication's Inc. 5000 which ranks America's fastest growing private companies.

John Godbout, founder and CEO of CCS Presentation Systems, stated, "We are so pleased with our continuous growth and success during this difficult economic climate. It's an honor to receive this recognition and support from *Inc.* magazine for the second consecutive year."

CCS serves customers in the corporate, government and educational sectors. The company sells, installs and services equipment as well as trains clients to use A/V technology. CCS offers multiple product lines to enhance presentation effectiveness and customer experiences including interactive SMART™ Boards, LCD & plasma displays, projectors and projection screens. Founded in 1991, CCS was started by a husband and wife team and has grown into one of the largest A/V integrators in the U.S. with more than 300 employees and sales offices in 13 states.

"Our clients are increasing their use of audio and visual technology each year and that has fueled our growth," said Godbout. "As the demand for A/V technology increases, businesses will see A/V integrators as major partners in helping organizations become more effective at training employees, teaching students in classrooms, enhancing the effectiveness of sales teams and creating richer customer experiences."

CCS is also an innovator in A/V training among educators and corporate professionals. CCS trains more than 3,000 educators each year through its centers in Scottsdale and Tucson and through its Mobile Training Center, which debuted in March 2006. CCS instructors teach administration and faculty members to use interactive whiteboards, projectors, document cameras, digital and video cameras, audience response systems and more.
