CCS Presentation Systems Partners with ASU's W. P. Carey School *CCS Scottsdale Location Hosts Evening MBA Classes*

SCOTTSDALE, Ariz. – (Aug. 14, 2008) – CCS Presentation Systems, the largest integrator of audio and visual equipment in the Southwest, is partnering with the W. P. Carey School of Business at Arizona State University to host classes for the school's fall 2008 Evening MBA Program beginning Aug. 20.

This new CCS Scottsdale location for the school offers more flexibility for busy working professionals who want to broaden their business and managerial expertise through the completion of an MBA on a part-time schedule. They can earn a prestigious W. P. Carey MBA while still being able to balance employment and family life. The Evening MBA Program also allows students to network with other professionals who have diverse business leadership experience. The 21-month program is offered at five locations across the Valley.

"We are very proud and excited to be joining forces with the W. P. Carey School of Business and hope offering this Scottsdale location for ASU's Evening MBA Program encourages future students to take advantage of our state-of-the-art technology," said John Godbout, founder and chief executive officer of CCS Presentation Systems.

The CCS classroom is among four different CCS locations in the metropolitan Phoenix area, including Scottsdale, Tempe, downtown Phoenix and south Tempe. Students attending Evening MBA classes at the Scottsdale location will experience cutting-edge technology exclusively available at the CCS training facilities. This includes the world's largest high-definition plasma television, a 103-inch diagonal display by Panasonic, as well as the latest presentation and e-learning technology.

CCS is an innovator in audio/visual training among educators and corporate professionals. CCS trains more than 2,000 educators each year through its centers in Scottsdale and Tucson and its Mobile Training Center, which debuted in March 2006. The Mobile Training Center includes a 12-seat computer lab featuring both Windows and Mac platforms and provides access to the latest audio and visual equipment for training corporate and educational clients. CCS instructors teach clients, including ASU faculty members, to use interactive whiteboards, projectors, document cameras, digital and video cameras, audience response systems and more.
