CCS Presentation Systems Installs Innovative Technology for Casino Arizona

SCOTTSDALE, Ariz. – (January 8, 2010) – CCS Presentation Systems, the largest integrator of audio and visual equipment in the Southwest, today announced the company is in the final stages of completing its approximately two year project with Casino Arizona.

John Godbout, founder and CEO of CCS Presentation Systems, stated, "Having the opportunity to work with Casino Arizona has really given us a chance to showcase some of our most innovative and unique A/V designs. We are thrilled that this cutting edge casino will be complete with state-of-the-art LCD TV's for entertainment and digital messaging, which will really enhance customer experiences. "

Areas such as gaming floor space, spas, restaurants, bars, meeting rooms, ballrooms, the pool area and even the parking garage were taken into consideration when designing the distributed audio throughout the property. Each venue operates with different occupancy estimates which impacts the noise volume, in turn, demanding a sophisticated system to compensate for consistent audio distribution.

Casino AZ will have LCD monitors strategically installed through out the property to display cable TV images, digital messaging along with some restaurants having menus on the monitors.

CCS serves customers in the corporate, government and educational sectors. The company sells, installs and services equipment as well as trains clients to use A/V technology. CCS offers multiple product lines to enhance presentation effectiveness and customer experiences including interactive SMART™Boards, LCD & plasma displays, projectors and projection screens. Founded in 1991, CCS was started by a husband and wife team and has grown into one of the largest A/V integrators in the U.S. with more than 300 employees and sales offices in 13 states.

About CCS Presentation Systems, Inc.

Since 1991, Scottsdale, Ariz.-based CCS Presentation Systems, has served customers in the corporate, government and educational sectors. CCS provides full-service integration, installation and maintenance of audio and video equipment, including interactive whiteboards, projectors, LCD & plasma displays, audio systems, document cameras and more.
