CCS Launches iWant Technology Program

A/V Integrator Offers Arizona Schools Unique Opportunity to Help Fund Classroom Technology

SCOTTSDALE, Ariz. – (September 27, 2010) – CCS, the largest integrator of audio and visual equipment in the Southwest, launched today its “iWant Technology!” program created to assist K-12 schools in the installation of technology for individual classrooms. Classes with 30 students or more are eligible to earn a \$150 credit towards the installation of interactive teaching equipment between now and December 31, 2010.

CCS designed a 12-month space themed calendar for teachers to send home with students of Arizona schools. Participating students complete educational questions about the calendar’s illustrations and return the signed form to their teachers. For each signed and returned form, teachers will receive a \$5 technology credit towards the installation of new CCS purchased equipment for their classroom.

“Education is evolving rapidly and audio visual technology has become essential to foster student interaction and improve student achievement,” said Marketing Manager, Julie Solomon of CCS. “Technology such as projectors and collaboration tools allow teachers to quickly add multimedia and interactivity to their lessons, engaging and involving their students. Through our iWant Technology! program, we hope to provide educators a more cost-effective option to obtain these necessary teaching tools.”

Additionally, students can go online with their family and enter to win a computerized Celestron NexStar 102 SLT Telescope - a \$500 value from a local astronomy shop called Photon Instrument.

In order to participate in this free program, teachers or schools should contact CCS directly. For the greater Phoenix area, call 480-348-0100 and for Tucson, call 520-318-0100.

CCS is an innovator in A/V training among educators and corporate professionals. CCS trains more than 3,000 educators each year through its centers in Scottsdale and Tucson and through its Mobile Training Center, a 12-seat computer lab on wheels. CCS instructors teach administration and faculty members to use interactive whiteboards, projectors, document cameras, digital and video cameras, audience response systems and more.

About CCS, Inc.

CCS iWant Technology – PAGE 2

Since 1991, Scottsdale, Ariz.-based CCS, has served customers in the corporate, government and educational sectors. CCS provides full-service integration, installation and maintenance of audio and video equipment, including LCD & plasma displays, digital projectors, interactive whiteboards, room control systems, audio systems, high definition videoconferencing systems and more. The company has expanded from a two-person operation to one of the largest A/V integrators in the U.S., with more than 450 employees, sales offices in 13 states and annual revenue in excess of \$160 million.
